CONTENTS AND EDITORIAL MAP

03	INTRODUCTION + GLOSSARY A plain-English guide to the model language.	09-28	20 CLUB FILES A graphical fantasy dashboard for every team.
04	THE MODEL BIG BOARD Top stable projections for the full season.	29-32	POSITION RANKINGS Goalkeepers, defenders, midfielders and forwards.
05	FAN VOICE VS FORECAST Where expert popularity and the model disagree.	33	VALUES + SLEEPERS Affordable players with season-long upside.
06	CLUB STRENGTH LANDSCAPE Attack, defence and recent-form context.	34	RISK BOARD Transfer flags and crowd-model gaps.
07	CLUB FANTASY POOL Season-long depth, premiums and value by club.	35	MODEL SQUAD A season-projection-optimized 15-player shortlist.
08	SET PIECES + TRANSFERS Dead-ball roles and summer movement.		

EDITORIAL PROMISE

The model is a baseline, not a certainty. Projection, price, role, club context, transfers and popular opinion are presented together so every pick has an upside case and a reason for caution.

INTRODUCTION AND GLOSSARY

A FANTASY GUIDE FOR DECISIONS, NOT DATA LECTURES

This magazine turns a full season of player, club and public-opinion evidence into a quicker way to build a squad. You do not need to be an analyst: use the numbers as signals, then apply team news and your own football judgement.

THE THREE QUESTIONS BEHIND EVERY PICK

1 **ROLE**

Will the player start, and where will he play?

Minutes and detailed position data come first.

2 **OUTPUT**

What can the player produce over a season?

Projection estimates points, not certainty.

3 **CONTEXT**

Does the club lift or limit the opportunity?

Team strength changes clean-sheet and return potential.

HOW TO READ THE MAGAZINE

1 **START WITH THE BIG BOARD**

Find the strongest full-season projections.

2 **CHECK THE CLUB PAGE**

Confirm role, position, team index and competition for minutes.

3 **TEST PRICE AGAINST UPSIDE**

Value highlights useful points without premium cost.

4 **COMPARE CROWD AND MODEL**

Fan Voice shows where popularity may be leading the evidence.

5 **FINISH WITH RISK**

Transfers, availability and uncertain roles can break a good projection.

PLAIN-ENGLISH GLOSSARY

SEASON PROJECTION	Estimated fantasy points across the full campaign.
TEAM INDEX	Club environment: 1.00 is league-average context.
ATTACK / DEFENCE	Relative team strength; above 1.00 is stronger.
xG / xA	Chance quality expected to become goals or assists.
xGD/90	Expected-goal difference per 90 minutes.
VALUE	Projected season points produced per £1m of price.
TACTICAL ROLE	The player's detailed on-field position, not only FPL group.
FAN VOICE	Popular expert opinion used as sentiment evidence.
RISK FLAG	A warning about transfer, availability or role uncertainty.

BEST PRACTICE: USE THE MODEL TO BUILD A SHORTLIST - USE TEAM NEWS TO MAKE THE FINAL CALL

A high projection is a starting point. Minutes, position and deadline information remain decisive.

READING THE LANDSCAPE

Arsenal lead the blended team context, with Manchester City and Manchester United close behind. Ipswich, Coventry and Hull are no longer neutral: their Championship xG/xGA ranking maps them to the prior EPL profiles of Wolves, West Ham and Burnley respectively.
